

GD-19E/171E

JVC UNVEILS TWO NEW LOW-COST LCD MONITORS WITH SXGA RESOLUTION FOR SECURITY APPLICATIONS

India Mumbai, (7th JAN 2011)– JVC Professional Products, division introduced the **GD-191E** and **GD-17E** Professional Series LCD monitors. The low-cost monitors offer **SXGA (1280x1024) resolution** and are designed to provide years of reliable service.

With better video processing components than other low-cost alternatives, the monitors **deliver 5ms response time, 800:1 contrast ratio, and 250cd/m² brightness**. Plus, each monitor features a **built-in 3D comb filter** to reduce composite video processing artifacts and ensure a sharp picture with less noise. Built for 24/7 operation, the new GD -19E and GD -17E monitors feature non-glare screens housed in stylish, slim bezels.

It's not always easy for security professionals to find a balance between affordability and reliability, JVC delivers the best of both worlds with our new Professional Series monitors. They are durable monitors that deliver excellent images at a very attractive price point.

Both 4:3 monitors feature a variety of inputs, including two BNC and one S -Video input, each with a corresponding looping output. There is also an RGB input with its own stereo mini-jack audio input, as well as a pair of RCA audio inputs that are shared between the video sources. A simple user interface on the front of the unit provides easy access to the on-screen menu, input selection, volume, power, and auto image adjustment controls. The monitors also feature a tilt adjustable stand for comfortable viewing, plus two built-in speakers for audio monitoring.
